### DESCRIPTION AND PURPOSE OF ITEM

For a structure that has been designated as having fracture critical members, this item indicates the frequency (in numbers of months) by which the structure should receive a fracture critical inspection.

This interval is established for all fracture critical bridge types as indicated by Item 92A1.

The Fracture Critical Inspection Interval also pertains to bridge types G1 and G2 of Item 92A1 that are related bridge types - not fracture critical.

Other required special feature inspection intervals should be reported using Item 92C - "Special Feature Inspection Interval".

### CODE AND SCREEN ENTRY INSTRUCTIONS

A two-digit code.

Enter the interval in terms of number of months, filling the leading space with zero.

EXAMPLES:

<u>Interval</u>	<u>Enter</u>
6 Months	06
12 Months	12
Not fracture critical or related bridge type	00
